Biographical Note

The firm Chloethiel Woodard Smith & Associated Architects was operated by award-winning architect Chloethiel Woodard Smith as principal from 1963 to 1982. The firm's most influential work in Washington, D.C., was the urban renewal project carried out in the Southwest quadrant. Most of the designs produced for the Southwest quadrant project are represented in the Smith & Associated Architects architectural drawing archive (Library of Congress). Other projects designed by Smith, either in private practice or as a partner in several other firms, include the United States Chancery and Ambassador's residence in Asunción, Paraguay; the unbuilt Consolidated Federal Law Enforcement Training Center in Beltsville, Maryland; La Clede Town, a riverfront neighborhood in St. Louis, Missouri; and the unrealized master plan for Arverne in Queens, New York. Before organizing Chloethiel Woodard Smith & Associated Architects, Smith was in partnership with Arthur H. Keyes, Jr., Nicholas Satterlee, and Francis Lethbridge in the firm of Keyes, Smith, Satterlee & Lethbridge from 1951 to 1956 and with Nicholas Satterlee in the firm of Satterlee & Smith from 1956 to 1963.

Scope and Content Note

Primarily architectural drawings by Chloethiel Woodard Smith & Associated Architects for urban planning projects in the Southwest Urban Renewal Area of Washington, D.C. Among designs represented in the archive are Harbour Square and Capitol Park housing developments, Washington Channel Waterfront, and the Washington Channel Bridge. Materials document various phases of the design process, from preliminary sketches to working drawings, and include correspondence and specifications relating to building projects. The archive also includes landscape architecture drawings, engineering drawings, and planning drawings by other creators as well as some architectural drawings done under the earlier firm names of Keyes, Smith, Satterlee & Lethbridge and Satterlee & Smith.

Specific media or processes represented include graphite, ink, diazo print, stat, blueprint, and photomechanical print.

Some ADE UNITS have additional materials to the drawings that are filed separately. If present, these series are noted at the end of the ADE UNIT's summary with the following options: specifications, photographs, and/or miscellaneous supplementary materials. These materials are not item inventoried but can be requested from a librarian while doing research in the Reading Room.

Arrangement

The collection is organized into 22 groups (called UNITS), which are usually based on separate building projects. Items are arranged numerically within a UNIT according to the staff-assigned number. Commission numbers are noted when available.
